DETAILED ACTION

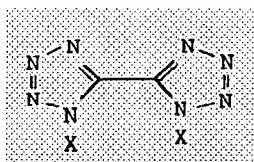

Claims 1-13 pending in the instant application.

Election/Restrictions

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a process for the preparation of 5,5'-bi-1H-tetrazolediammonium salts, classified in class 548, subclass 250.
 - II. Claims 10-13, drawn to a different process, for the preparation of oxaldiimidic acid dihydrazide, classified in class 564, subclass 233.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). The instant process of invention I is distinct and independent from invention II, since each invention defines a process for preparing a different structure (as defined by different formulae) with distinct chemical properties. In the instant case the separate inventions I and II are each directed to a different process of preparation, for producing two patentably distinct compounds, i.e. dihydrazide compounds according to formula (1):

Or bis-tetrazole compounds according to formula (2):

that are unrelated compounds with diverse structures, separate status in the art, and distinct utilities.

Art Unit: 1626

Invention I is distinct and independent from invention II, because Invention I is a process of preparation of a compound of formula (1), and Invention II is a process of preparation of a compound of formula (2). The compounds (1) and (2) are different compounds that are classified differently and require completely different search conditions, such that the practice of Invention I would not result in the practice of Invention II, i.e. a process of preparing a dihydrazide compound of formula (1) is not a process that prepares *per se* a different compound of formula (2).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and separate search conditions are involved, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Robert L. Haines, Reg. No. 35,533, on December 6, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. In order to advance prosecution, when responding to this action, the Examiner recommends canceling the non-elected subject matter from the claims.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
